

# Ocean Park Hong Kong Education Programme for Mainland China and Overseas Students

The time has come to begin your discovery of the natural world at Ocean Park Hong Kong! As a world-class theme park with a range of nature-oriented facilities, we offer several education programmes for primary and secondary students from Mainland China and abroad. During our programmes, young explorers act out the role of scientific researchers. By visiting animal exhibits and park facilities, and engaging in fun and interactive games, they uncover the secrets of nature, and broaden their knowledge of biology and physics to unleash their scientific reasoning and potential!

## Ocean Discovery

### Junior

What are the differences in physiology between huge sharks and tiny sea jellies? What kind of important and unique senses do they have? Unveil the secrets lurking in their bodies when you visit Shark Mystique and Sea Jelly Spectacular, and through interactive group games! By the end, you will understand the interconnections between different ocean animals in the food web!

### Senior

An exploration of marine life begins! Visit the Grand Aquarium to learn about the physiology and survival skills of various marine animals. At Shark Mystique, you get to debunk common misconceptions about sharks and understand the concept of sustainable fisheries! This is your chance to learn how to use natural resources wisely and produce a video that promotes a sustainable lifestyle to the public!

# Rainforest and Polar Discovery

## Junior

Learn the greatest in the animal kingdom! Visit the Rainforest and Polar Adventure to discover the unique talents of different animals, and then pick a "King" among them with your group mates! Through an interactive game, find out how the rainforest, polar regions and humans are connected, as well as learn to appreciate the importance of biodiversity. Think deeply about how to cherish our animals and natural resources by making changes in your daily life!

## Senior

As you explore the Rainforest and Polar Adventure, you will find that humans have an inseparable relationship with the rainforest and polar regions! Learn the origin of ingredients behind everyday products through an interesting experiment and interactive games! We can take part in conserving nature by becoming smart consumers every day!

# Rides Discovery

## Junior

While playing on a ride is fun, a lot goes into making each ride work! Bounce on the Frog Hopper, then explore the use of simple machines before seeing how hydraulics power familiar theme park facilities. Afterwards, create your own exciting stall game using the knowledge about simple machines you just learnt!

## Senior

Discover what lies behind the thrills of a roller coaster! Compare and examine the elements of different roller coasters at Ocean Park by taking a ride on the Dragon and Mine Train! Build and test your own roller coaster based on the law of conservation of energy and tell everyone you're now a roller coaster expert!
