

OCEAN PARK IS READY TO WELCOME YOU BACK TO HAVE FUN!

Ensure animals' health

- Disinfection carpets are placed at the entrances of all animal exhibits.
- Double filtering and UV sterilisation are installed in the air conditioning systems at most of the animal exhibits to maintain good indoor air quality.
- Daily health checks are conducted on our animals, including respiratory rate checks for penguins and body temperature checks for seals.

Enhanced restaurant and food hygiene

- In compliance with Government's regulations, tables in all park's restaurants are set at least 1.5m apart.
- Before and after daily operation, all food and beverage facilities are thoroughly cleaned and disinfected. Tableware will not be set in advance but presented along with alcohol wipes upon food orders.
- Following each meal, the table's surface and menus will be cleaned with a specialised disinfectant.
- To maintain hygiene, all food will be covered before serving to visitors.

Safeguard visitors' health

- Visitors are required to undergo body temperature check before admission.
- Face masks must be worn at all areas inside the park (except when dining).
- Visitors can access free hand sanitiser at 112 different spots throughout the park.
- All the air filtration systems are regularly sprayed with GERMAGIC Thyme disinfectant, which was developed by the professionals of Hong Kong University of Science and Technology and can kill 99% of viruses and bacteria for a prolonged period of time.
- Floor stickers are placed in waiting areas to keep a safe social distance.
- Visitors may reserve up to 6 attractions via the Ocean Park Hong Kong app's "eScheduler" function, and may reserve restaurant tables via THE GULU app, to cut down waiting time at queue line.

Thorough disinfection and cleaning

- Nano-photocatalyst antimicrobial coating is applied to major facilities including handles, outdoor seats, buttons, counters, escalators and lifts.
- Intensified cleaning and disinfection of all toilets, baby care rooms and frequently touched facilities surfaces are carried out every 1-2 hours.
- All tools and teaching materials are disinfected at the game booths, and education classes before reuse.
- Each night, cleaning teams perform deep cleaning across the park using high-pressure jets.

Reinforced crowd control

- Park-wide capacity and capacity of individual rides and facilities will be adjusted. Visitors are required to make online reservation before visiting the park for crowd control management.
- Alternate-row seating arrangement is implemented at all theatres.
- Visitors from the same party are not required to share a Cable Car with other passengers.
